OIL FIELD IS NOW AT SHAMROCK

Dog Canyon and Camp City
First; Now the Irish
Name Is Used.

In the beginning it was just plain Dog Canyon. Dog Canyon, D-o-g C-a-n-y-o-n. That was when it was but a wide place in the road. Then, after awhile Camp City was the handle they gave it and the postoffice department called it Camp without the city part. It sounded great but was a bit disappointing when a glimpse was obtained of the place which was neither a camp nor a city.

Now it is Shamrock. Just why no one has yet been able to fully explain. But Shamrock it is according to the U. S. postoffice department, and Shamrock it will stay unless it is changed. The new name of the little town promises to deprive El Paso of a number of its future citizens. No man of Irish blood will ever be able to get past a town with that name even if he is on his way to El Paso.

Dog Canyon, alias Camp City, alias Shamrock, is located 76 and two-tenths miles east of El Paso in the almost sovereign state of New Mexico.

Elephant Butte dam may be "made in El Paso."

F. Y. Jewett, chief inspector of the reclamation service, arrived in the city Saturday from Denver and during the day went to the plant of the Southwestern Portland Cement company for the purpose of making an inspection of the product of the plant and its capacity. The cement that will go into the big irrigation project will be purchased by bid, and if the quality of the product of the El Paso plant comes up to specifications and the price is adjudged reasonable, El Paso can say with truth that the big dam was "made in El Paso."

"Will El Paso cement be used in constructing the Elephant Butte dam?" W. M. Reed, district engineer, was asked upon his return from the camp of the dam site Saturday morning.

"I will tell you what I have told the cement people," said Mr. Reed. "If the quality is right and the price is right, it will."

Regarding the work at the site of the dam, Mr. Reed said that it is so far confined to reconstructing the camp, which an illness of over 18 months has left in a somewhat dilapidated condition. Some work is being done excavating rock that has previously been loosened. By next week the real work will begin.

Bids for the roadwork for the railroad to be run from the Santa Fe main line to the dam site will be opened on August 8. The contract consists of three schedules, the earthwork, the removal of 45,000 yards of rock and the construction of bridges, the government furnishing the material. Bidders may bid on any one of the schedules or all of them. The Santa Fe road will lay the rail.

The road to the camp will be 1.04 miles in length and will branch off from the Santa Fe about mid-distance between Cutter and Eagle, running south of the butte to the camp.
